

Emergency Parachute for Pilot

DESCRIPTION:

Emergency parachute are specifically designed to provide pilot with safe and comfortable emergency solutions.

- Unique ergonomic design, lightweight with no impact on flight navigation.
- Innovative materials and fabrics with enhanced structural strength.
- Adjustable harness system to ensure safety comfort, ease of donning.

Performance Specifications

Model	T150
Maximum Parachuting Weight	115kg
Maximum Deployment Speed	278km/h (150kts)
Minimum Deployment Altitude	100m
Stabilized Descent Rate	≥6.5m/s
System Weight	6.5kg
Pack Volume	50*35*4cm
Canopy Area	57m ²
nos of line	20
Steerability	No
Reefing System	Yes
Repacking period	180 days
Operating Temperature	-40°C~+60°C
Service Life	12 years

Equipped with AAD for automatic deployment in emergency situations.

Stable and reliable deployment with a low descending rate after opening.
